

FitUp is a unique cloud-based solution to manage, and coordinate thousands of pieces of medical equipment, IT components and furniture information in one consolidated database maintained in real-time.

## FreightTrain's Newest Module

### Drives Project Collaboration

Provides a single-source solution to facilitate the work, coordination, and communication needed for new facility equipment logistics

### Promotes Accountability

Provides a robust issue management process to reduce resolution time and promote accountability

### Supports Critical Project Decision Making

Provides real-time data that matters, including project status, space readiness, and issue tracking metrics

### Improves Field Efficiency

Facilitates in-field product tracking through custom forms, reports, and interactive floor plans
